SKILLS

- Next.js, React
- JavaScript (ES6+), TypeScript
- HTML5 & CSS3
- Version Control/Git (GitHub, GitLab)
- Automated Testing (Jest, React testing library)
- CI/CD (basic familiarity with pipelines/deployment on Netlify, Vercel)
- API Integration (REST)
- Problem-Solving & Analytical Mindset
- Project Management (Agile/Scrum, Jira)
- Strong Communication & Teaching Background
- AI Integration (prompt engineering with ChatGPT/GPT-4, using GitHub Copilot for code suggestions)
- UI/UX Sensibilities (basic design principles, accessibility)

EDUCATION

FRONTEND DEVELOPMENT
Code2Career AB
November 2023 - January 2025

BACHELOR'S DEGREE IN PEDAGOGY
Really Great University
2014 - 2016

PROFILE

Web developer transitioning from an education background. Proficient in React, TypeScript, and AI-driven development tools (GitHub Copilot, ChatGPT). Known for clear communication, efficient problem-solving, and delivering engaging, user-focused applications.

EXPERIENCE

SECONDARY SCHOOL TEACHER

Really Great School

2016 - Present

- Developed and led classroom projects using interactive e-learning tools, resulting in a 25% increase in student participation.
- Researched AI-driven apps (ChatGPT) to create engaging lesson plans, reducing preparation time by 30% and boosting student engagement.

PROJECTS

INTERACTIVE LEARNING PLATFORM

A dynamic web application built with Next.js and React, designed to connect teachers and students in real-time.

- Responsive & High-Performance: Utilizes Next.js for server-side rendering and React for a smooth, responsive UI.
- TypeScript-Powered: Ensures robust code quality and maintainability through strong typing.
- Geolocation & Google Maps Integration: Allows students to find nearby educators or online resources tailored to their learning needs.
- Teacher Profiles & Availability: Enables teachers to showcase their skills, set schedules, and update availability in real-time.
- Review & Rating System: Encourages high-quality teaching by letting students share feedback and experiences.
- Automated Testing & CI/CD: Implements Jest tests and a continuous deployment pipeline for reliable releases.

Hello, [Hej, ${name}]

I came across the Front-End Developer position at Wearin' and was really excited about the opportunity to apply. The role seems like a great match for my skills and interests, especially since I've just wrapped up a Frontend Development Program with Code2Career.

In the bootcamp, I got hands-on experience with JavaScript and ReactJS. I've always been the kind of person who loves to figure out how things work under the hood, which is why I love programming. The bootcamp had a strong focus on practical skills like using public APIs and modern front-end tools, which has prepared me well for a real-world environment.

Testing and quality assurance were key parts of our training, and I really enjoyed the precision and attention to detail involved in writing various tests. I also have been using Git throughout my training.

I am very much looking forward to joining a team where I can grow, and from what I've learned about Wearin', it sounds like an environment where I could really thrive.
I've attached my resume and would love to chat more about how I can contribute to Wearin'. Looking forward to hearing from you!

Warm regards,

John Doe
